

SKYWATCH® BL300

The Skywatch BL300 accurately measures wind speed, temperature and humidity connecting to your smartphone via Bluetooth for instant readings. It permits you to share your measurements on popular social networks. Specially designed for outdoor activities such as sailing, kite surfing, paragliding and hiking the Skywatch BL300 can easily fit in a pocket or backpack for on the go readings when site specific data is required. Measured data can be stored and shared on Facebook, Twitter, Instagram or bl. Skywatch.ch.

SKYWATCH® BL400

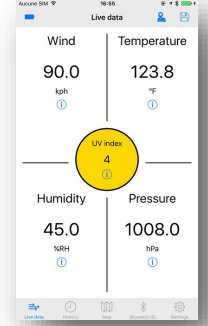

The Skywatch BL400 is a complete Weather Station connected to your smartphone via Bluetooth®. It measures accurately wind speed (wind direction), temperature (wind chill - heat index), humidity (dew point) and pressure (altitude - QNH) and allows you to share your measurements on most social networks. The Skywatch® BL400 is especially dedicated for all outdoor activities like sailing, kite surfing, paragliding, hiking and so on, but also very usefull for professionals working in agriculture, on construction sites and minesites.

SKYWATCH® BL500 with UV Index

The Skywatch® BL500 is a complete weather station connected to your smartphone via Bluetooth®. It measures accurately wind speed, temperature, humidity, pressure and **UV index** and allows you to share the measurements on most popular social networks. . Specially designed for outdoor activities such as sailing, kite surfing, paragliding and hiking the Skywatch® BL500 can also be used by professional working in agriculture, on construction sites and minesites.

SKYWATCH® Xplorer1 Windmeter / Anemometer

The JDC Skywatch Xplorer1 offers exceptional accuracy at a remarkable value. Although small in size, it is not lacking in features. Single button operation allows for easy measurements, and the display has a back light; handy for low-light conditions. It is waterproof

SKYWATCH® Xplorer2 Anemometer-Thermometer

Small and lightweight Anemo-Thermometer. On a backlit screen it displays: max wind speed reached, current temperature and wind-chill factor. Wind measuring range: 3 to 150km/h, Temperature: -50° to +100°C. It is waterproof, has auto shut off after 1 min and comes with a replaceable lithium battery and 12 months warranty.

SKYWATCH® Xplorer 4 - Anemometer-Thermometer with Electronic Compass and Barometric Pressure/Altitude Functions .

Instant windspeed measurement with: max speed , current temperature, windchill factor, compass in degree, altitude and relative pressure or absolute pressure displayed. Wind measuring range: 3 to 150km/h, Temperature : -50°C to +100°C, Compass—vertical position Altitude: -700m to + 9000m . It is waterproof, has autoshut off after 1min and comes with replaceable lithium battery and 12 months warranty.

SKYWATCH® Geos 11 - High precision portable Weatherstation

Measures barometric pressure, airspeed, humidity, altitude and temperature. Made for use in harsh environments, multi purpose, accurate and equipped with a large memory capacity. Real time data transfer. Applications include: Agriculture, Civil Engineering, Aviation, Geology, Science, Firefighter, Military, Sports and Leisure etc. It has an inbuilt LED flashlight, electronic compass and is waterproof. The Geos 11 comes with software and 4 replaceable lithium batteries and a 12 month warranty. Optional extras: Windvane, Adaptor for Windvane, software Skywatch log.

SKYWATCH® Eole Waterproof Windmeter Anemometer

Skywatch Eole is an anemometer with a 54mm impeller who measures wind strength without worrying about its position. The large easy to read display shows instant windspeed, maximum windspeed and average windspeed all at once. The display is made up 99.9 at the 10th, then to the unit. The device is powered by two AA batteries. The aluminium base with a thread allows its mount on a camera tripod.

SKYWATCH® Meteos Thermo - Anemometer

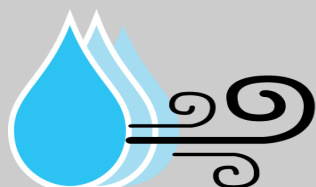

Wind speed and Temperature meter, including a calculation mode of the wind-chill factor. (Wind-chill factor is a calculation of the wind effect on temperature).Meteos is a thermo-anemometer who measures wind strength without worrying about his position. Used by firefighters, farmers, scientist etc. Comes with replaceable AA batteries.

SKYWATCH® Atmos Anemometer - Thermometer - Hygrometer

The ATMOS Anemometer-thermometer-hygrometer is specially designed for professional use in agriculture, environmental monitoring, expeditions and much more. The accurate, user friendly and multifunctional Skywatch Atmos is unsinkable and comes with multidirectional impeller and cap, has an inbuilt backlight and a aluminium bottom plate for fixing to a tripod. It comes with 2AA batteries, protective pouch and 12 months warranty.
