

MCE LASERS - Lasers With Imagination

SB.300.TAIL.LR LONG RANGE

APPLICATION

This calibrated laser is used in the mining industry to show a reference point when required. A standard Brass tail end is set with quick drying cement in a drilled hole with a SB.300 Tail aimed at spot required for future use. When quick drying cement is cured the SB.300 Tail is removed. At any future time a SB.300 Tail laser can be placed in the brass tail and reference point found.

SPECIFICATIONS

Overall length	220mm
Tail Length	90mm
Operating distance	250 meters
Spot size	approx. 35mm @ 200m
Diameter	20mm
Tail end diameter	8.8mm
Batteries	2 x "N"
Brass tail	14 mm outside
