

LS-700 Laser Sight

The LasereX LS-700 Laser Sight is one of the smallest and most accurate laser sighting devices in the world.

The LS-700 comes with a built-in precision windage and elevation adjustment, allowing you to quickly zero the firearm. The LS-700 holds an accurate zero, even under heavy recoil.

Utilising the very latest in gun sight technology, the LS-700 produces an ultra bright red laser spot.

The LS-700 appears bright to the human eye and is complemented by a glass lens with high quality anti-reflective optics, allowing maximum beam transmission.

Proudly Australian made, the LS-700 is ideal for both recreational and sporting shooters.

The LS-700 is suitable for dawn, dusk and night time use.

The unit comes with a Weaver mount that locks down onto the commonly used Weaver rail.

LasereX can also supply a scope mounting system, allowing for the LS-700 to be mounted directly above the rifle scope.

The Scope mount fits scopes of 25mm tube and up to 50mm objective lens.

Figure 8 mounts are also available. These fit barrels of 15mm-18mm diameter.

With external casings made from aircraft grade aluminium, the LS-700 weighs only 33 grams.

The LS-700 comes complete with four batteries that provide approximately 3 hours of continuous use.

Technical Specifications

Weight: 33 grams (including batteries)

Laser Diode: 635nm Ultra Bright

Lens: Glass

Power: <1mW

Dimensions: 57mm long x 16mm diameter

Output Range: 700m

Spot size: 60mm diameter at 100m

Activation: 150mm long custom Low Pressure Switch

Adjustments: Elevation & Windage (+/-1 degree)

Battery Type: 2x ANS150D8LC Lithium or 2 x 3 volt 1/3 'N' Cells or SR44 Button Cells

Battery Life: Over 3 hours continuous use

Warranty: 3 years

Laser Class: Class 2 to Australian Standard AS/NZS 2211.1
