

Senshin Fibreglass Height Measuring Pole

Made of high quality, lightweight, strong and durable fibreglass. The fully insulated high poles have a sliding tape measure inside that passes by an index window. This makes it easy to use as you do not need to pull out the sections in sequence; the tape is simply reading the height difference between the top of the pole and the base. The pole has a flip up hook-end for measuring internal or external heights. Available in 4m, 6m, 8m and 12 m lengths. Comes in a sturdy carry bag.

Pole Length	Sections	Minimum Length
4 metre	8	69 cm
6 metre	8	94 cm
8 metre	8	142 cm
12 metre	10	141 cm

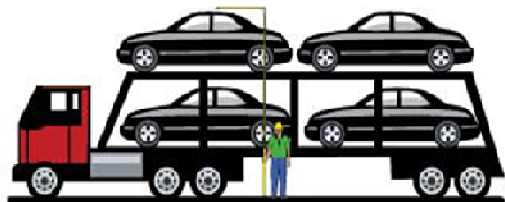

Flat Round Top on 4 & 6m Pole	Fold out Hook for 8m Pole inside or outside measuring	T Top on 12m Pole

Senshin 5m & 8m Fibreglass Vehicle Height Measuring Pole

The Truck or Load Height Measuring Stick is especially designed for Vehicle Height checking. It features a right-angle adapter and a 1.3m crossbar so you can measure the height of a truck from the middle of the vehicle rather than the side. A great way to avoid finding out the hard way that the air inlet snorkel, or the load is too high. The internal tape ensures accurate and reliable height reading. Comes in canvas carry bag.

Pole Length	Minimum Length	Weight
5 metre	128cm	1.7kg
8 metre	142cm	2.2kg
Cross Arm: telescopic extends from 75cm to 130cm
