Water Level Indicators

Richter Depth Gauge with Electronic Indicator

The Richter electronic water level indicator provides accurate water level measurements in wells or boreholes even under noisy conditions. When the probe touches the water level a light beams on the winding device and the beeper sounds - only water can set off the light.

The rugged construction includes a number of innovative features to ensure the accuracy and long life of the unit. Tapes come in length of 50meters to 500 meters.

A quality German made product.

50 Meter x 12.5mm Yamayo "Million" PVC Coated Fiberglass Open Reel Water Level Measure

The portable 50m open reel water level indicator consists of an extreme tough and durable fiberglass tape. Can be used without earthed line. Not to be used in Saltwater.

50 Meter Yamayo "Million" PVC Coated Fiberglass Tape Robe Water Level Measure

The Yamayo Water Level Indicator consists of a 6.2mm wide fibreglass tape with a very slim probe. It measures the water level by direct reading on the graduation of tape according to the signals of electricity, sound or light. Earthed line is not necessary when measuring. The 12mm diameter stainless steel probe is suitable for inserting down thin pipes or holes.

100 Meter Yamayo "Million" PVC Coated Fiberglass Tape Robe Water Level Measure

This sturdy and portable 100m PVC coated fiberglass tape combined with probe can be used in any conductive liquid. When the probe detects water the light is turned on and the buzzer sounds.

This instrument should not be used in petroleum or any flammable liquid.
